

Technical information

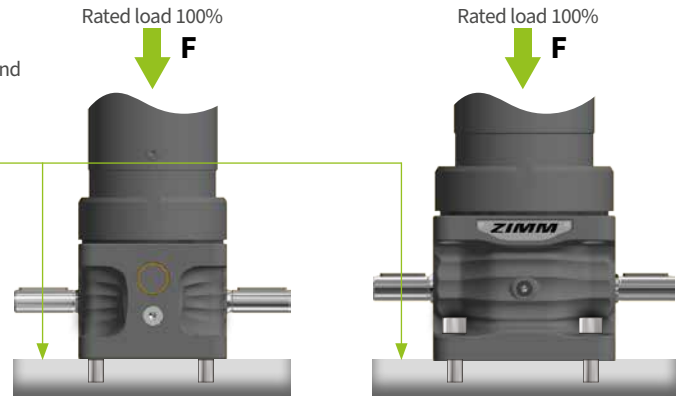

Permissible loads | Fixing & mounting

The actuators themselves are specified for full static nominal load under tension and compression. The permissible load depends on the type of fixing.

Compressive load (fixed)

Full rated load

The actuators can accept the full static rated load.

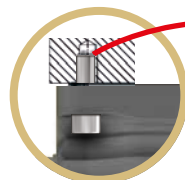

ZA-25

ZA-50 to ZA-200

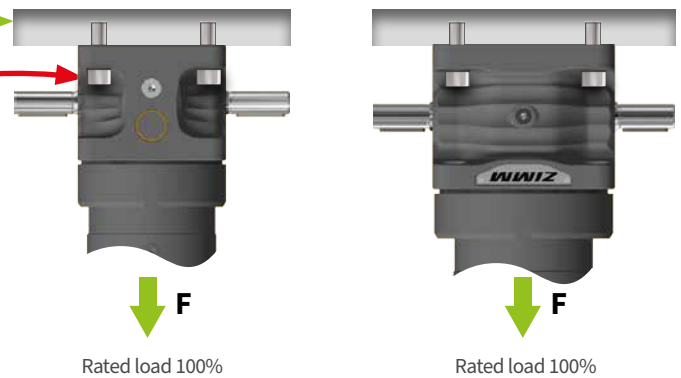

Tensile load (fixed)

Full rated load

Tensile load on the fixing screws (through holes in the housing).

Screws 8.8

Rated load 100%

Rated load 100%
